XCRiPad
Zone 2 Rugged iPad
Using an iPad in Hazardous Areas is Now a Reality!

iPad’s have become common place in the business environment due to the range of applications available on them. Therefore ecom, market leader in portable explosion protected equipment, added the XCRiPad for iOS users to its product line. With specialist modifications, the XCRiPad can resist shocks, vibrations, dust and water in both indoor and outdoor environments and allows the iPad 4 to be used within Zone 2 hazardous areas.

The XCRiPad is a nylon case that comes complete with a shoulder strap and an elasticated hand strap. The separate carry handle can be used to stand the iPad upright while in hazardous areas.

**Features & Specifications**

- ATEX 2 certified in combination with iPad 4
- Includes:
  - Special ruggedized rubber enclosure, sealed completely
  - Ballistic nylon carrying case (also available as spare part)
- Lightweight and Ultra-Portable
- IP67 (water & dust proof)
- Increased shock - protection
- Sun visor: improved outdoor readability

**Certification**

ATEX: II 3G Ex ic IIC T4 Gc
NEC: Class I, Division 2, Group A-D T5
Sun Visor

Friend of the sun...

With the bright sunlight readability of the XCRiPad itself in combination with the extendable Sun Visor of the ballistic nylon case the XCRiPad will be readable all day long.

Dimensions (without packing)
- Height: 190 mm
- Width: 279 mm
- Depth: 16 mm
- Weight: 1.5 kg - includes nylon carrying case.

Safety Instructions
- Do not remove the XCRiPad from its rubber enclosure at any time.
- Do not remove the ballistic nylon case in hazardous areas as it is part of the Zone 2 certification.
- Do not recharge the modified XCRiPad in hazardous areas.
- If any of the above is not followed, the ATEX Zone 2 certification will be voided!

ATEX Directive 94/9/EC defines Zone 2 as an area in which an explosive atmosphere (a mixture of air and flammable gases, steam or mist) is not to be expected under normal circumstances or just for a short period of time. Just one brief hazardous situation per year is enough to rate an area Zone 2. Zone 2 devices provide required ruggedness and fall protection, which ensures safety of use during normal operations without technical failures such as battery short.

An area must be classified Zone 1 if an explosive atmosphere can develop occasionally during normal operations. In that case only Zone 1 certified product must be used, which even in exceptional situations ensures necessary safety in case of failure.
